

## Abroad International School - Osaka

This report shows your school's achievement by grade in each domain in the ISA administered in Feb 2023.

In this report, your school's performance in each grade in a domain is represented by a box plot on the ISA scale. The length of the box represents the difference between the 25th and 75th percentiles: the middle 50% of students' scores are within this box. The point to which the line extends below the box indicates the 5th percentile, and the point to which the line extends above the box indicates the 95th percentile. The average scale score of your school is represented by a short black line in the box. The coloured dots on the left of the box plot represent average scale scores of male students and female students, and the coloured dots on the right of the box plot represent the average scale scores of the students from an English speaking background and the students from a non-English speaking background.

Your school's performance is shown side-by-side with three comparison groups: the performance of students in the same Like School group, the performance of students in the same region and the overall performance of students in all schools participating in the ISA. Note that these comparisons are drawn from the ISA Reference Norm. The ISA Reference Norm is based on the performance of all students across all administrations in the previous calendar year.

The OECD average score for 15-year-old students is plotted as a dotted line in Mathematical Literacy, Reading, and Scientific Literacy for grades 8 to 10. Equating of the PISA onto the ISA scale allows comparisons of your school's performance with OECD average scores.

The distribution of scale scores for individual students in your school is plotted along the described ISA proficiency levels.

Note: See below composition of the Like School groups.

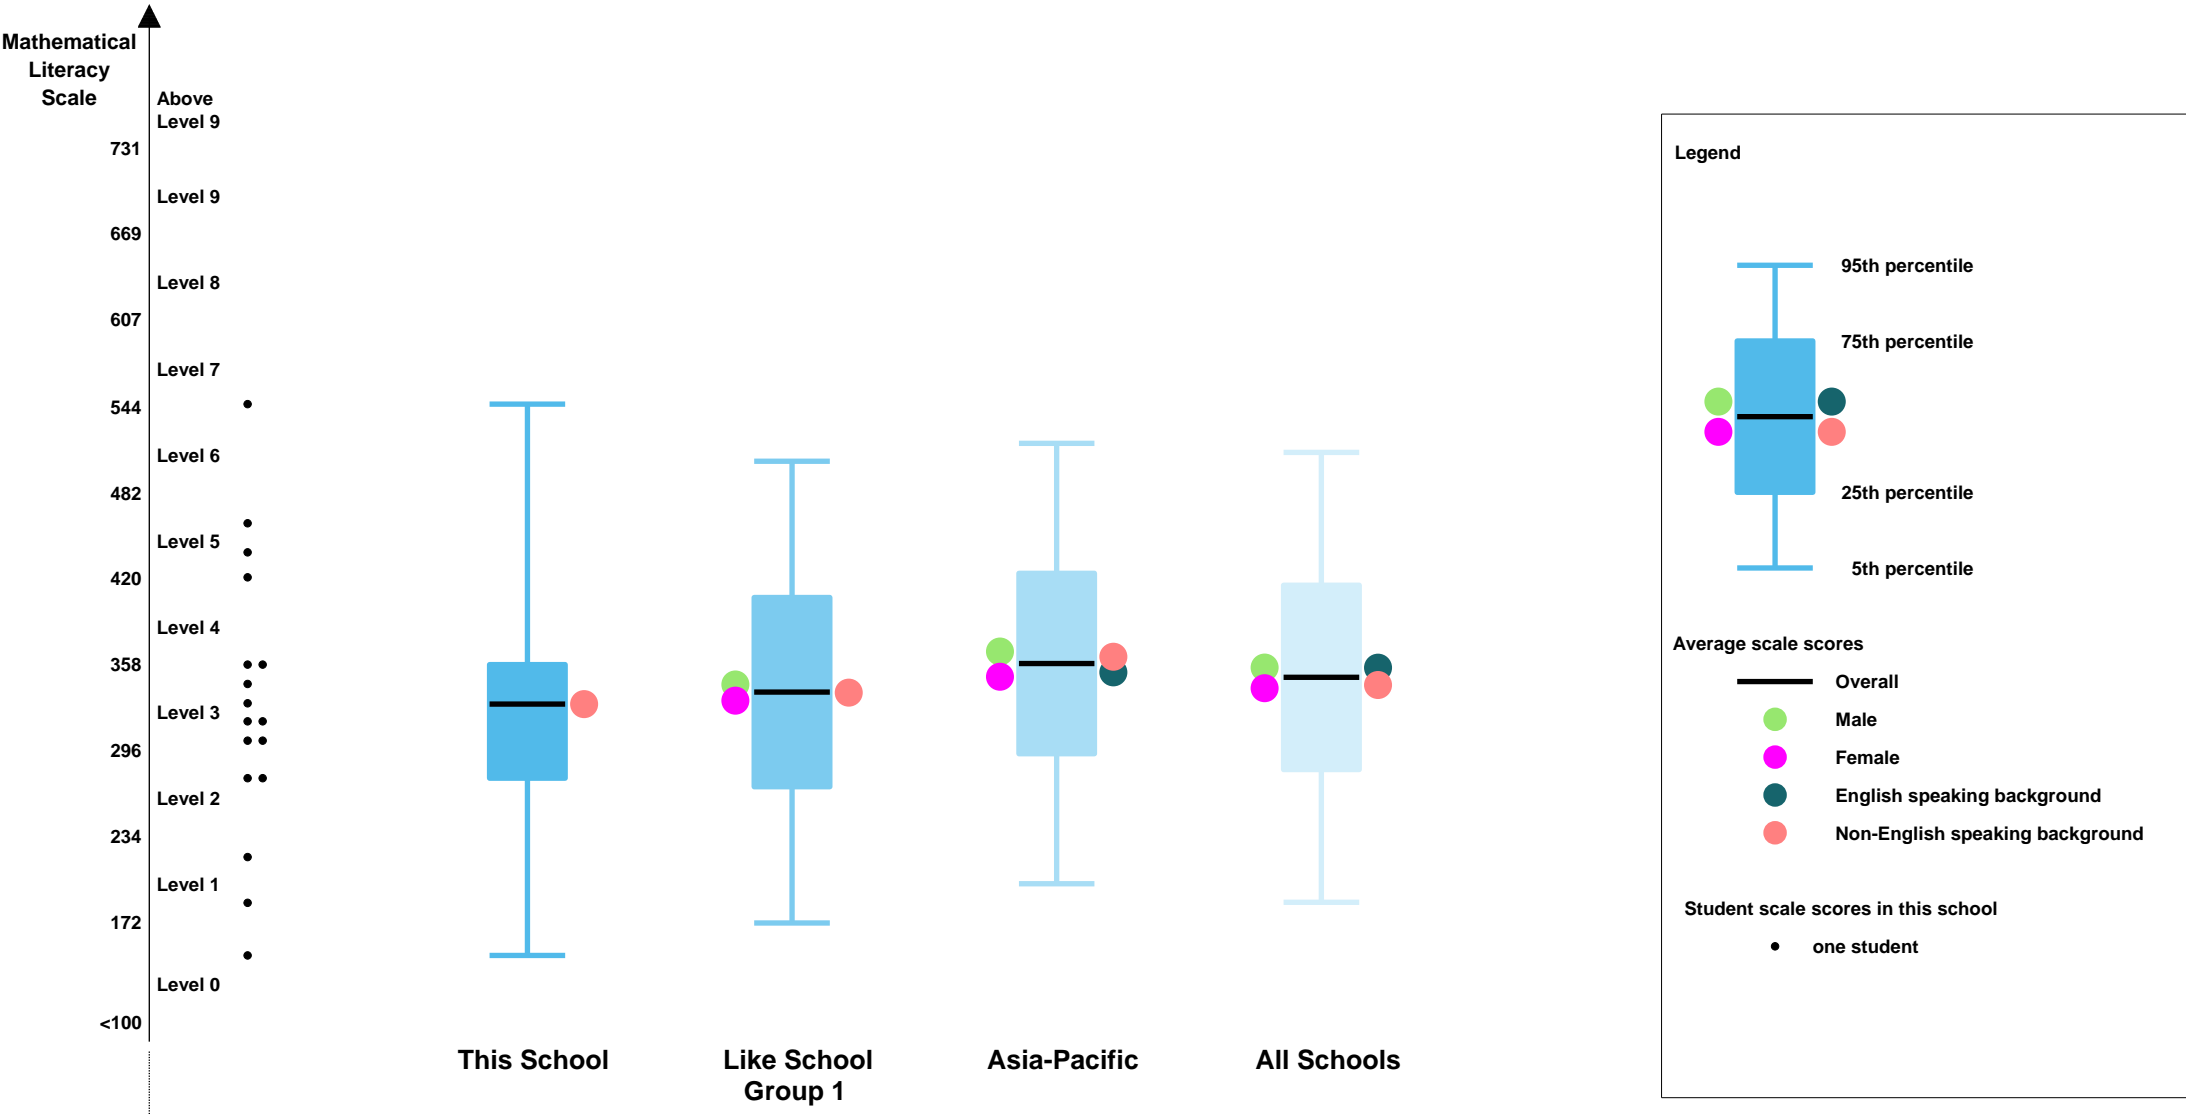

Group 1: 15% of students or less in the school from an English speaking background.

Group 2: between 16% and 35% of students in the school from an English speaking background.

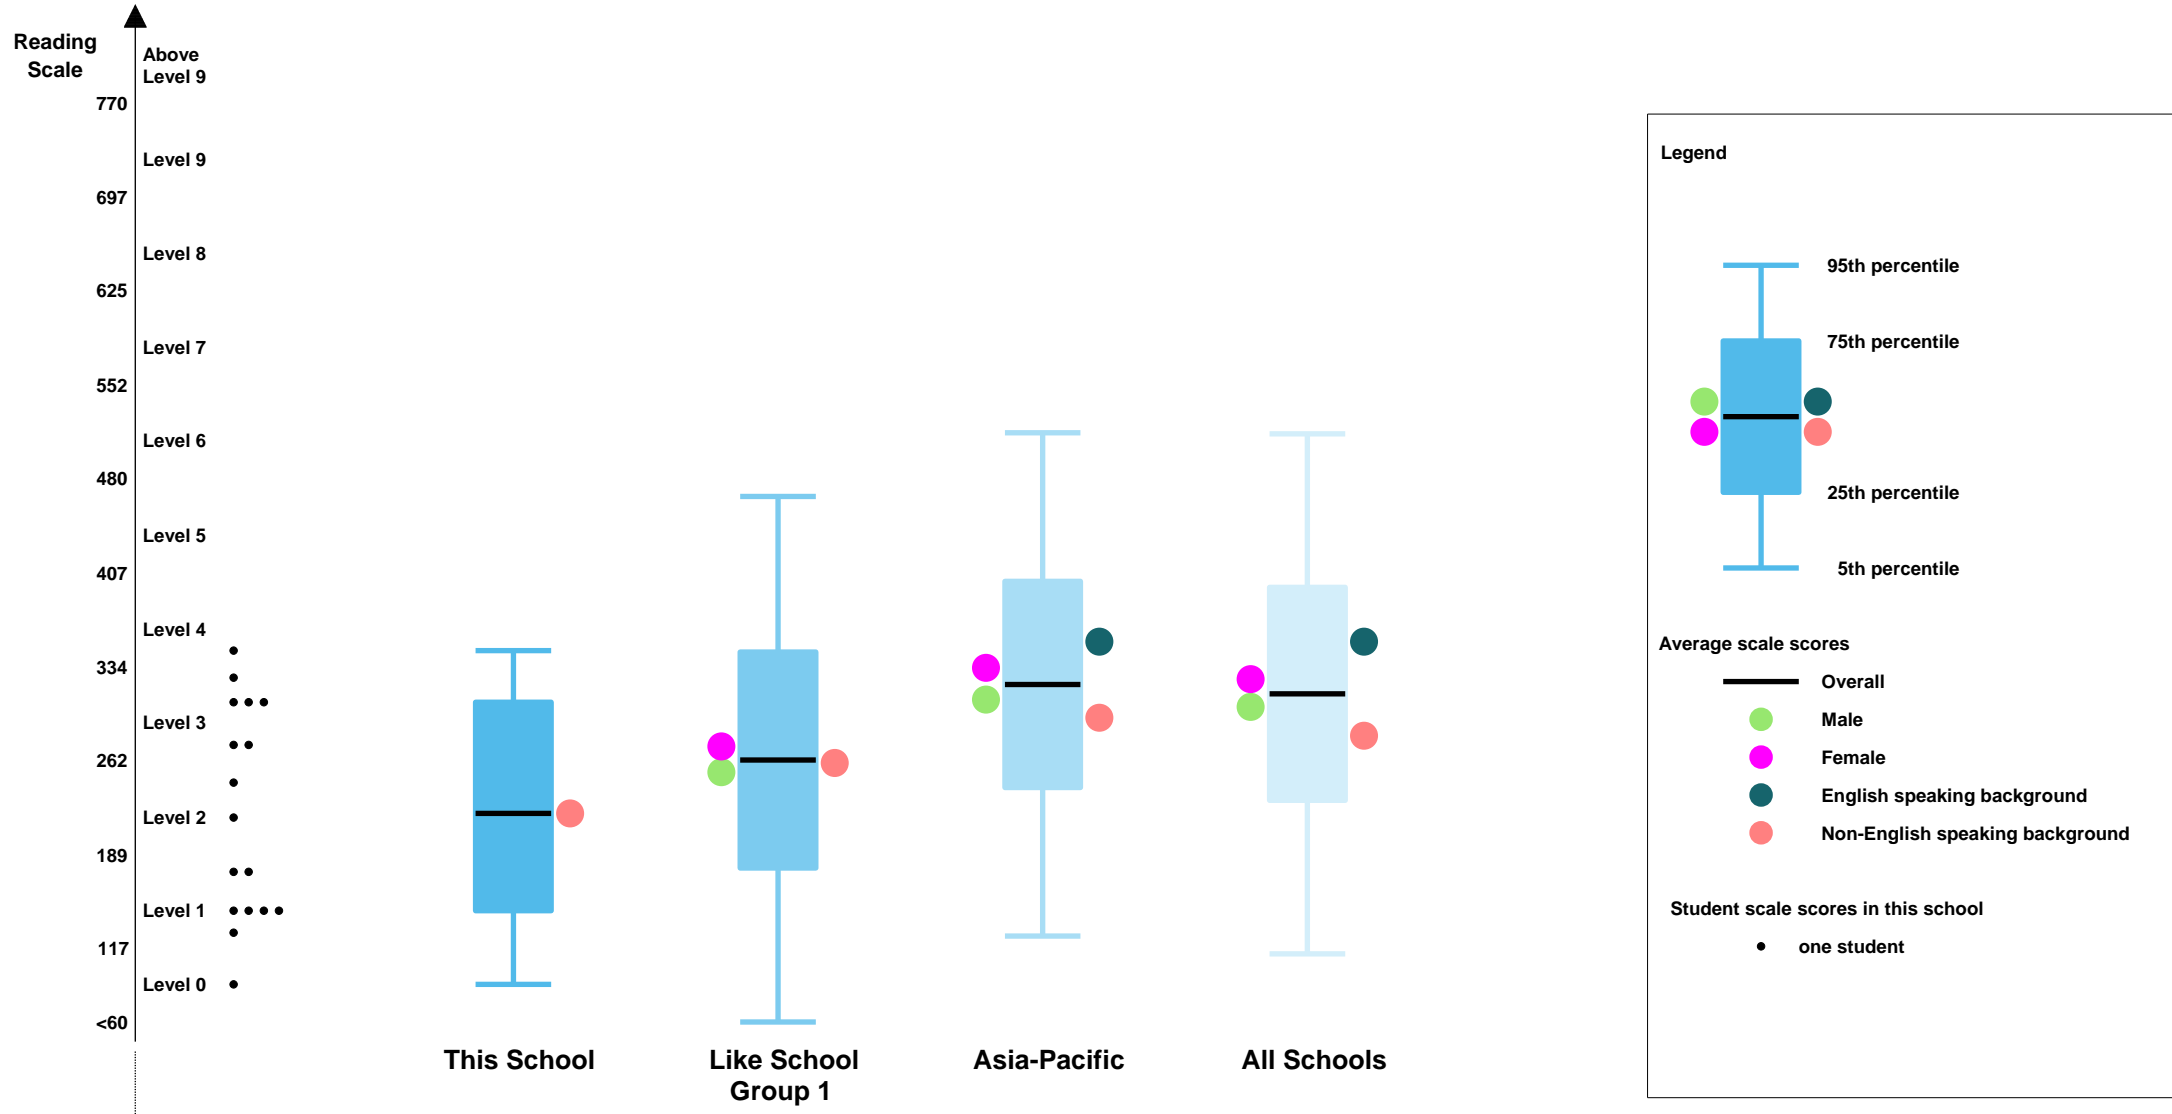

Group 3: between 36% and 55% of students in the school from an English speaking background.

Group 4: more than 55% of students in the school from an English speaking background.

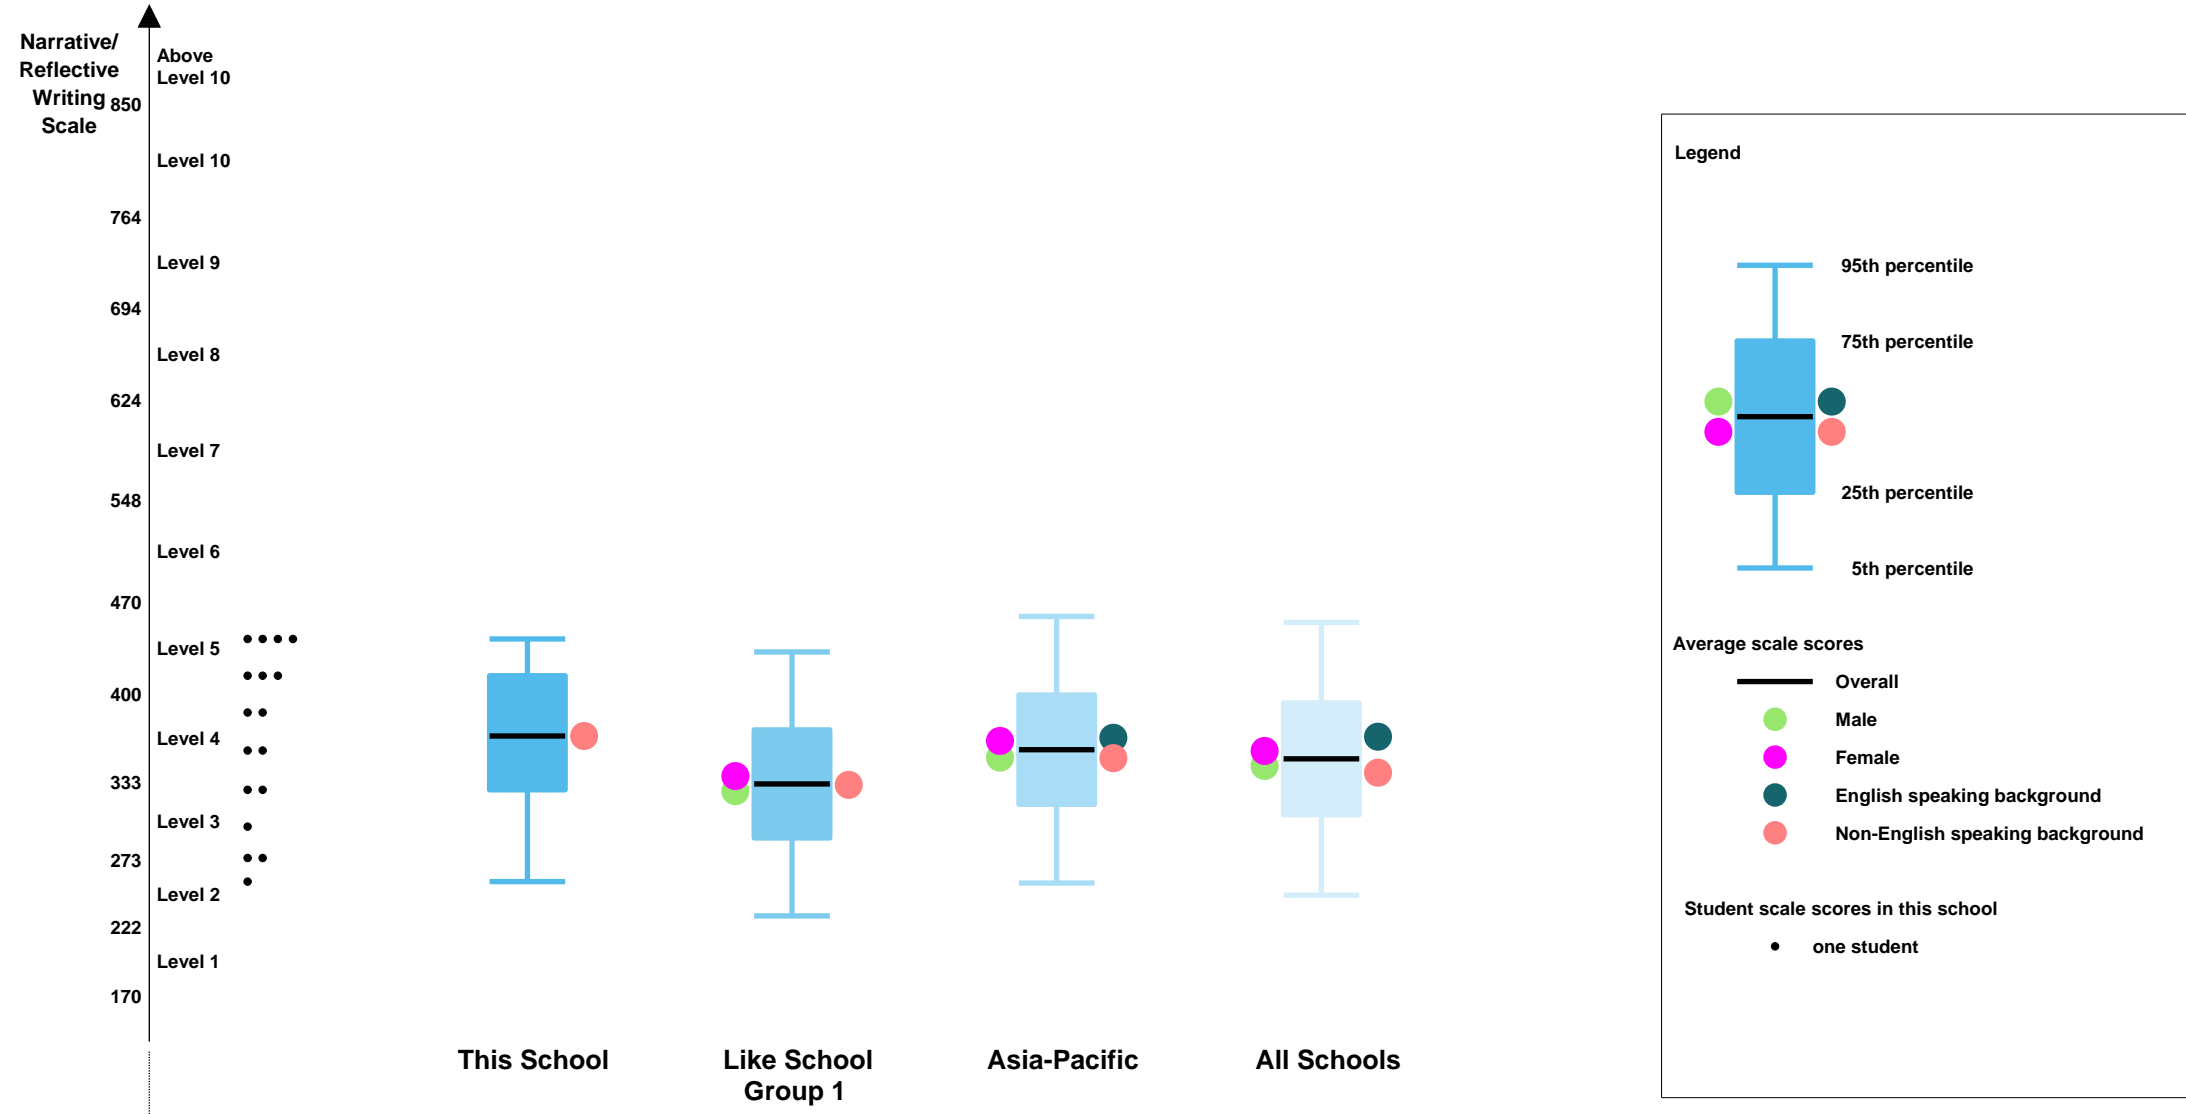

This chart shows the performance of students in your school compared to students in the same Like School group, students in the same region, and the students from all schools participating in the ISA. Note that the statistics for this school are reported only where the group size is greater than 10. Comparative data is not provided if the comparison group has less than 100 students.

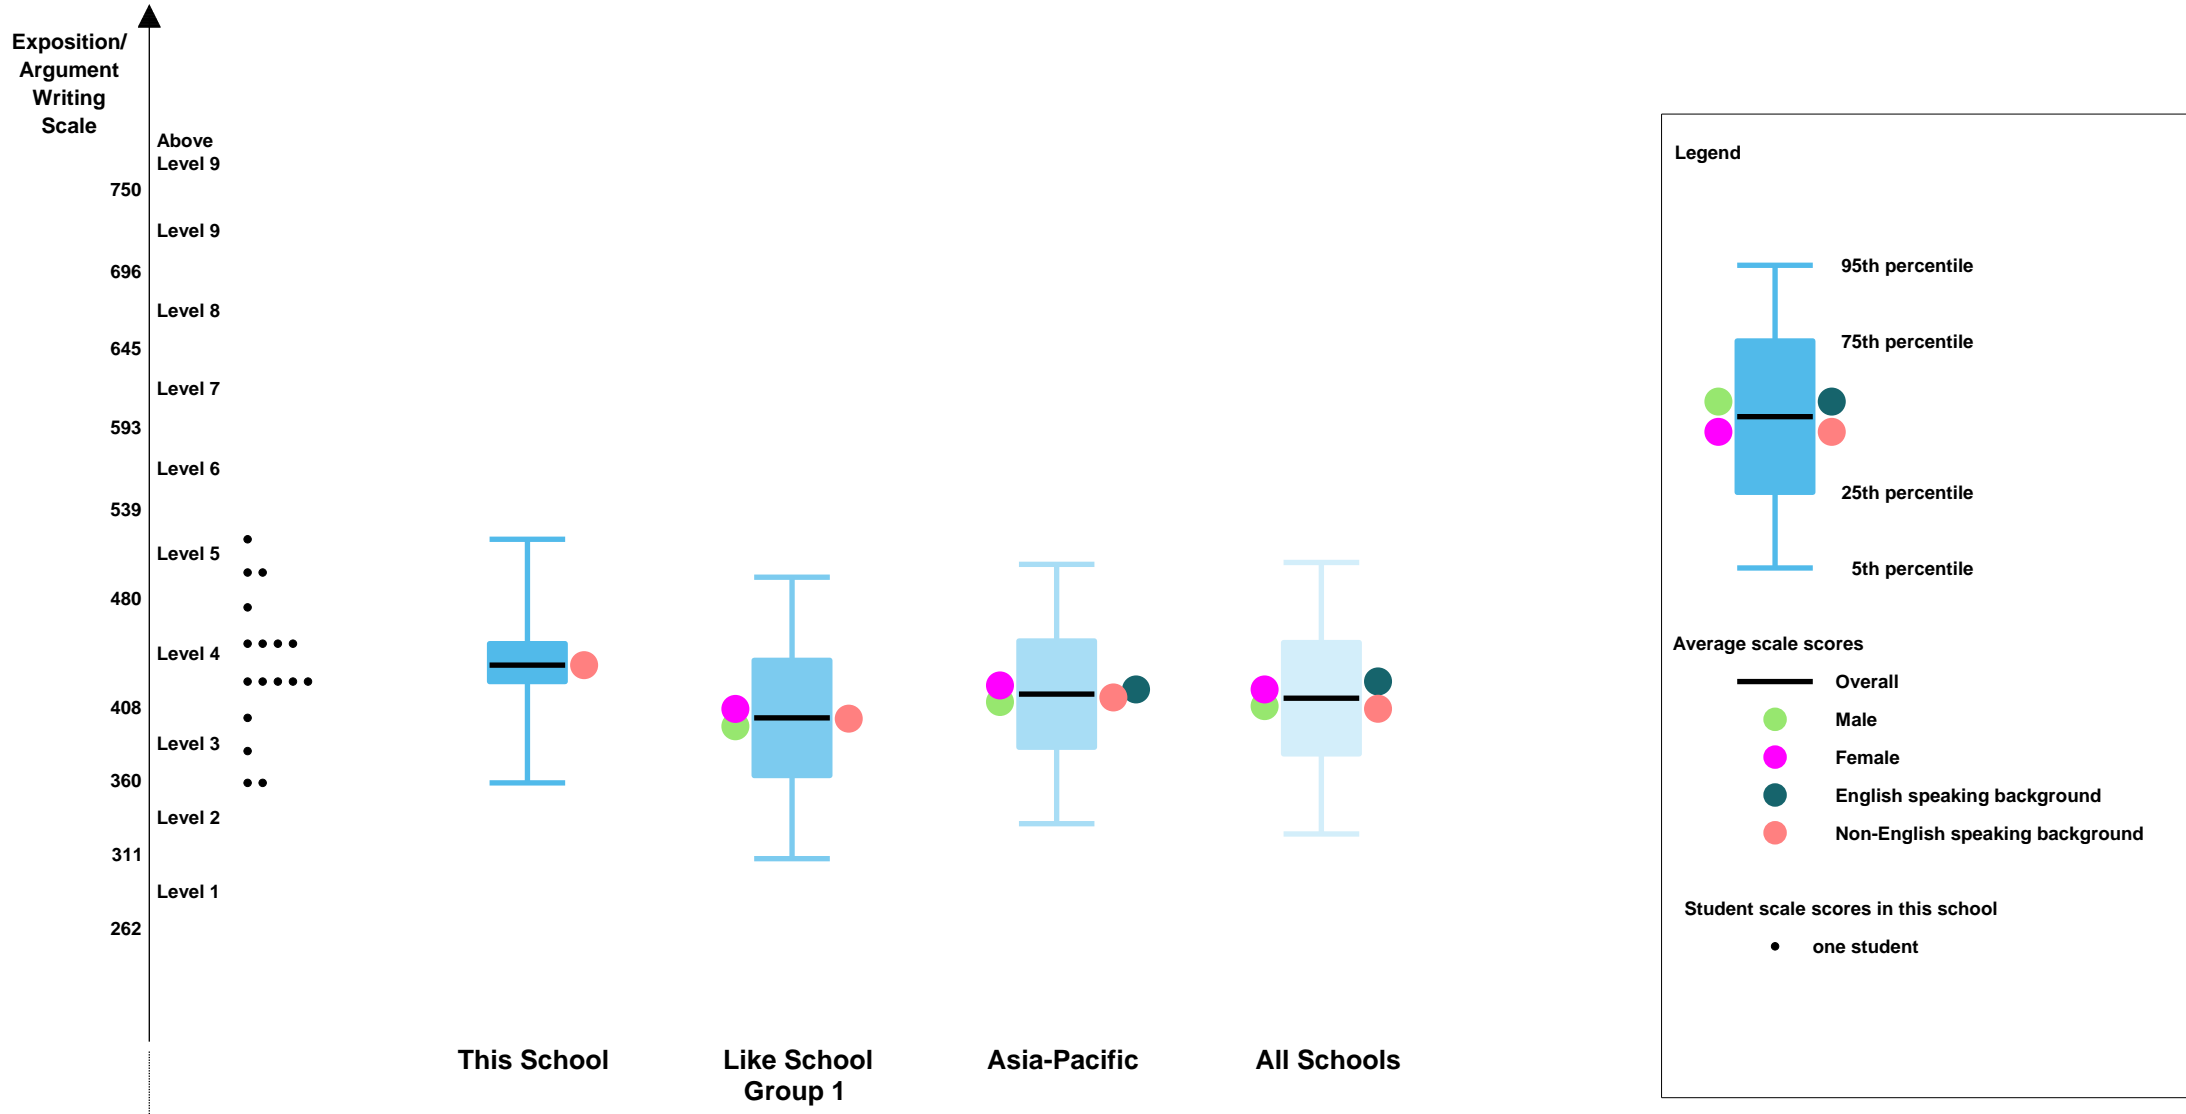

This chart shows the performance of students in your school compared to students in the same Like School group, students in the same region, and the students from all schools participating in the ISA. Note that the statistics for this school are reported only where the group size is greater than 10. Comparative data is not provided if the comparison group has less than 100 students.

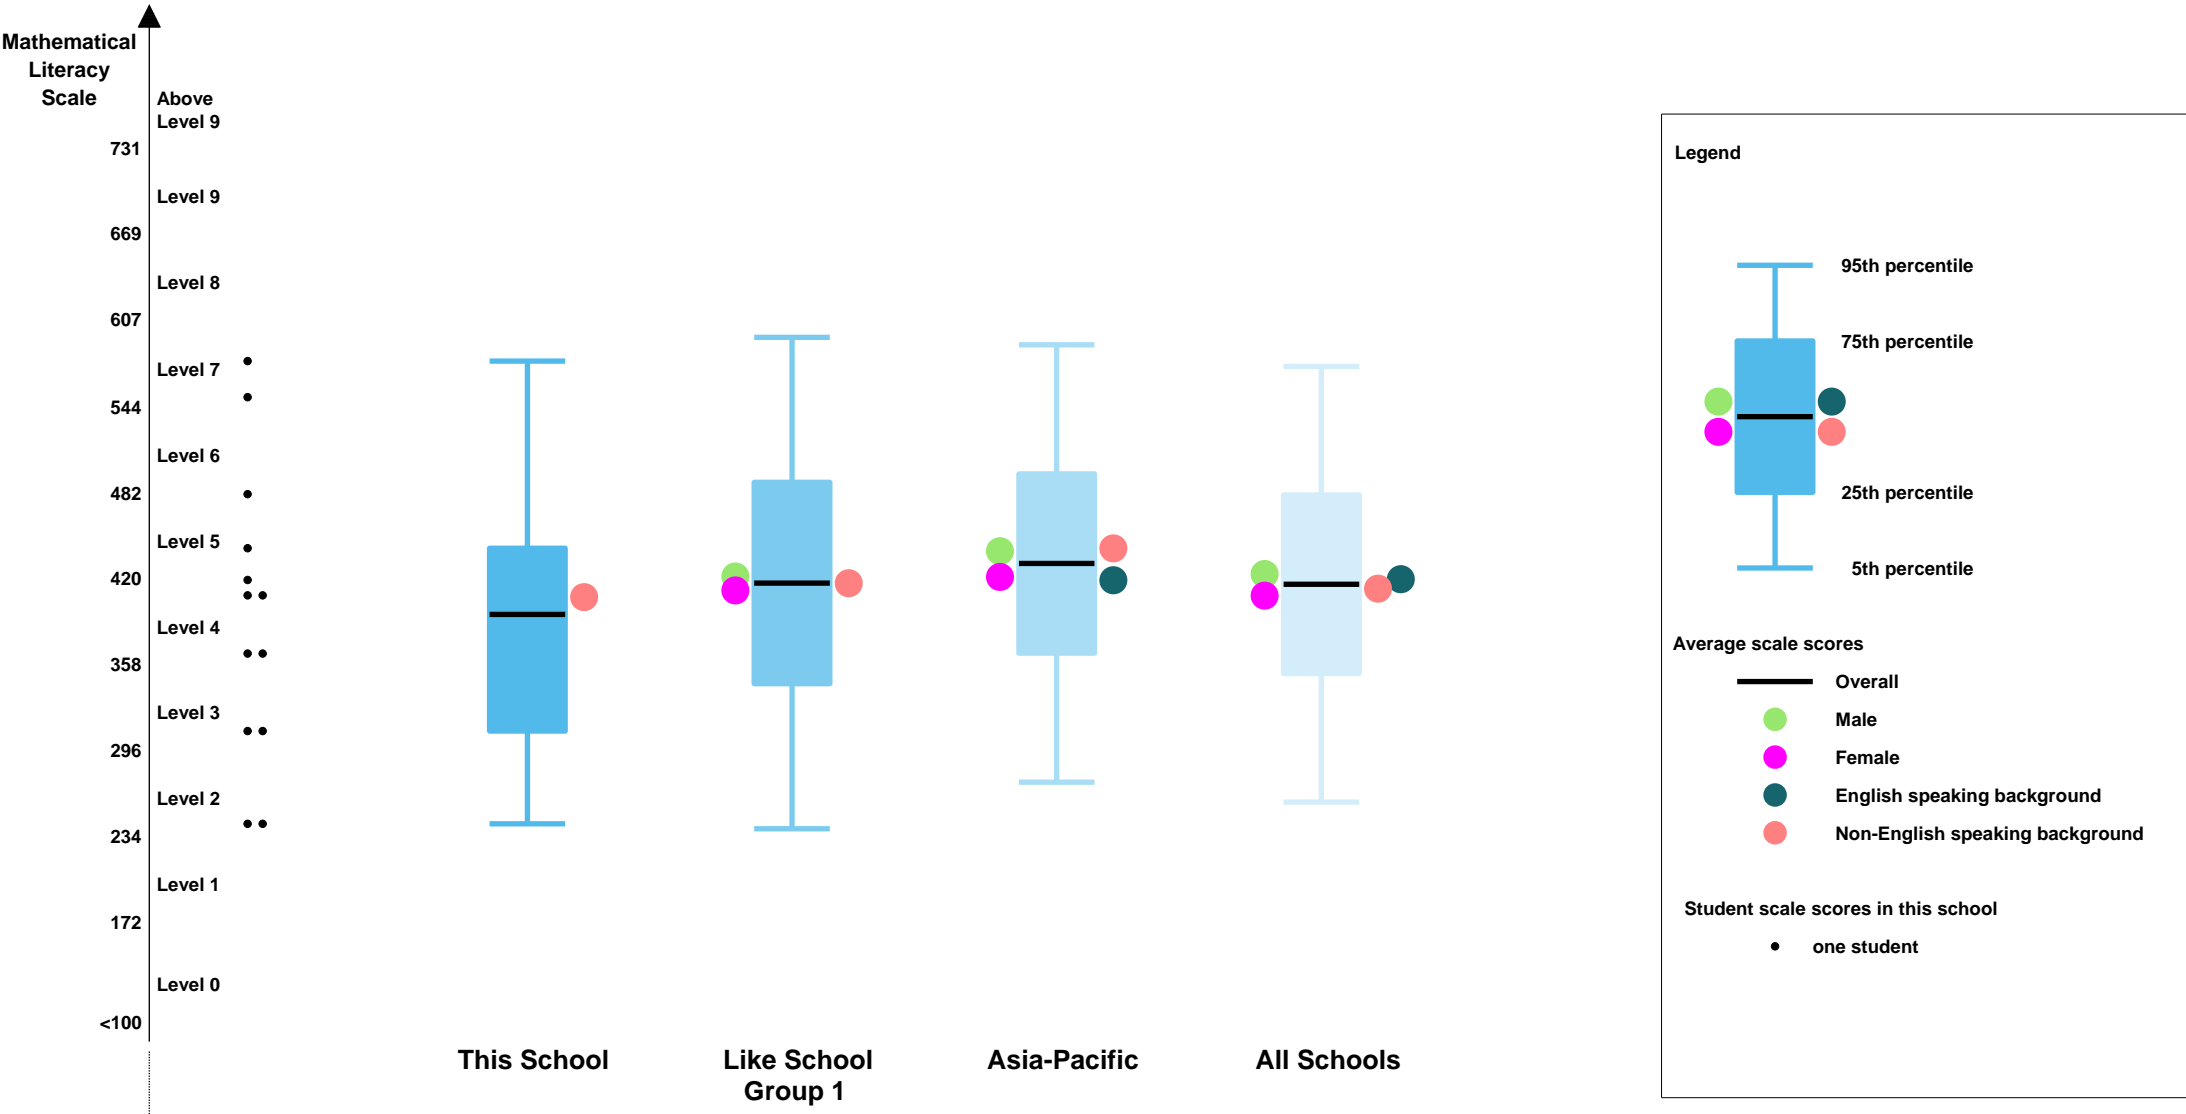

This chart shows the performance of students in your school compared to students in the same Like School group, students in the same region, and the students from all schools participating in the ISA.
